WASHINGTON -(F)- Following is the text of President Roosevelt's "fireside chat" Sunday night:

This is not a fireside chat on war. It is a talk on national security; because the nub of the whole purpose of your President is to later, and your grandchildren much later, out of a last-ditch war for the preservation of American independence and all of the things that American independence means to you and to me and to

an American expeditionary force outside our own borders. There is no intention by any member of your government to send such a force. You can, therefore, nail any talk about sending armies to Europe as deliberate untruth. Our national policy is not direct-

ed toward war. Its sole purpose is to keep war away from our country and our people.

Democracy's fight against world

Democracy's ignit against work conquest is being greatly aided, and must be more greatly aided, by the rearmament of the full distribution of the control of

other nations near Germany, to send steel and ore and oil and other war materials into Germany every day.

We are planning our own defense with the utmost urgency:

and in its vast scale we must integrate the war needs of Britain and the other free nations resisting aggression.

This is not a matter of senti-

ment or of controversal present opinion. It is a matter of realistic military policy, based on the advice of, our military experts who are in close touch with existing warfare. These military and naval experts and the members of the Congress and the administration have a single-minded purpose—the defense of the Unit-

purpose—the defense of the other ed States.

This nation is making a great effort to produce everything that is necessary in this emergency and with all possible speed. This

great efffort requires great sacrifice.

I would ask no one to defend a democracy which in turn would not defend everyone in the nation against want and privation. The strength of this nation shall

The worker possesses the same human dignity and is entitled to the same security of position as the engineer or manager or owner. For the workers provide the human power that turns out the destroyers, the airplanes and the tanks.

The nation expects our defense industries to continue operation without interruption by strikes or lock-outs. It expects and insist that management and workers will reconcile their differences by voluntary or legal means, to continue to produce the supplies that are so sorely needed.

And on the economic side of our great defense program, we are, as you know, bending every effort to maintain stability of

workers throughout the land.

In this great work there has been splendid cooperation between the government and indus-

try and labor.

American industrial genius, unmatched throughout the world in
the solution of production problems, has been called upon to
bring its resources and talents
into action. Manufactures of
watches, of farm implements,
linotypes, cash registers, automo-

biles, sewing machines, lawn mowers and locomotives are now making fuses, bomb packing crates, telescope mounts, shells, pistols and tanks. I Believe The Axis Powers Will Not Win But all our present efforts are not enough. We must have more ships, more guns, more planesmore of everything. This can only be accomplished if we discard the

notion of "business as usual." This job cannot be done merely by superimposing on the existing

future consequences of surplus plant capacity, the possible consequences of failure of our defense efforts now are much more to be

feared. After the present needs of our defense are past, a proper handling of the country's peace-time needs will require all of the new productive capacity-if not more.

No pessimistic policy about the future of America shall delay the immediate expansion of those industries essential to defense.

I want to make it clear that it is the purpose of the nation to build now with all possible speed every machine and arsenal and factory that we need to manufacture our defense material. We have the men-the skill-the wealth-

and above all, the will. I am confident that if and when production of consumer or luxury goods in certain industries requires the use of machines and raw materials essential for defense purposes, then such production must yield to our primary and compelling purpose.

I appeal to the owners of plants -to the managers-to the workers-to our own government employees-to put every ounce of effort into producing these munitions swiftly and without stint. And with this appeal I give you the pledges that all of us who are officers of your government will devote ourselves to the same wholehearted extent to the great

task which lies ahead. As planes and ships and guns and shells are produced, your government, with its defense experts. can then determine how best to use them to defend this hemis-

phere. The decision as to how much shall be sent abroad and how much shall remain at home must be made on the basis of our over-all military necessities.
